

User Manual

Food Run

Food Run is designed to help people store and use their food in refrigerator reasonably so as to decrease food waste in real life. Food also has its emotions. If you do not take care of them well, they may get sad and run to your roommates' storage. Following Food Run, the life expectancy of food will be prolonged and you will enjoy various delicious dishes.

When you buy food from the supermarket, you can stick the label to food and then put it into fridge. As time goes, the color of the label will change. Different color indicates different moods of food that are related to levels of food quality from excellent to spoiled.

When food starts in the mood of sensitive, it will come out from your phone screen to wave to you irregularly. The food hopes to attract your attention to eat it soon in this way.

When you click food which is coming out, it will go to the page of recipe. In this page, it will show recommended recipe of this food. The background color of recipe reflects the level of this food.

When you click right button or left button, the other recipes will show up. The other recommended recipes include combination of all your food in bad mood (sensitive, depressed and bad) and each single food in bad mood.

The bottom of each recipe has a edge of table. When you press the edge and drag up, a table with several recommended recipes involved in other roommates' food will appear. When releasing finger, it will go back to bottom. This page invites you to enjoy meal with your roommates.

Depressed

user1

user2

When food is in the period of depressed emotion, it will go away from you at any time. When the food leaves, it will appear in your roommate's phone. The person who wastes least will get the food first. So you can also get food from other people.

The fridge visualizes food that went away. Each circle represents a food item. The size of the circle means the amount of food item. When some food goes away from you, the size of one circle or the number of circles will increase accordingly. From another perspective, it shows how much food they waste.
